Summary

B.Tech Computer Science graduate focused on Data Science, Machine Learning, NLP, predictive modeling, and data visualization. Experienced in analyzing complex datasets, developing machine learning solutions, performing exploratory data analysis, and building data-driven applications using Python, SQL, Pandas, NumPy, Tableau, and modern ML techniques.

Skills

Languages: Python, SQL, Java
Machine Learning: Machine Learning, Deep Learning, Scikit-learn, Regression, Classification, Clustering, Predictive Modeling, Model Evaluation, Cross Validation
Data Science: Statistics, Pandas, NumPy, EDA, Data Preprocessing, Feature Engineering, Feature Selection, Statistical Analysis, Hypothesis Testing, PCA
Visualization: Tableau, Plotly, Matplotlib, Seaborn, Excel
NLP & AI: NLP, LLMs, RAG, Transformers, Hugging Face
Tools: Streamlit, Git, GitHub
Testing & Automation: Selenium WebDriver, TestNG, Maven, Page Object Model, WebDriverWait, BDD Cucumber

Projects

Multi-Phase AI Retrieval and Analytics Feb 2026 – Mar 2026
Python, Machine Learning, NLP, RAG, BM25, NetworkX, Streamlit

- Processed and analyzed 500+ research papers using NLP and machine learning techniques, transforming unstructured text into structured datasets for large-scale research analytics.
- Evaluated retrieval and ranking performance across 30 benchmark scenarios, achieving Recall@5 of 0.76 and improving MRR by 43%.
- Developed analytical dashboards with PCA-based visualizations, retrieval metrics, and EDA views to support model evaluation and data-driven insights.

Traffic Analysis Dashboard Jan 2025 – Feb 2025
Tableau, Python, Google Sheets, Geoapify API

- Designed a real-time traffic analytics dashboard in Tableau to track route efficiency, commercial hotspots, traffic patterns, and operational KPIs.
- Built an automated data extraction and transformation workflow across Google Sheets and Geoapify API, reducing manual processing effort by 80%.
- Generated geospatial insights and KPI-driven reports that improved traffic pattern analysis and enabled data-driven operational decisions.

DataGroq – AI Document Assistant Sept 2025
Python, NLP, Machine Learning, Groq API, Plotly, Streamlit

- Built a document analytics platform capable of processing and analyzing 200+ documents using NLP and machine learning techniques.
- Developed an NLP pipeline for tokenization, stopword removal, lemmatization, document classification, and keyword extraction, improving analytical accuracy by 30%.
- Created interactive EDA charts, correlation heatmaps, word clouds, and ML performance plots using Plotly to reduce manual analysis effort by 70%.

Work Experience

Programmer Analyst Trainee Jan 2026 – May 2026
Cognizant Technology Solutions

- Built and maintained a scalable Selenium TestNG automation framework using Java, Page Object Model, WebDriverWait, exception handling, and assertion-based validation.
- Automated end-to-end functional and UI testing workflows by developing reusable test components, improving coverage and reducing manual testing effort.
- Worked with Java, Selenium WebDriver, TestNG, Maven, Git/GitHub, Jenkins CI/CD, and BDD Cucumber in an Agile environment, collaborating with senior engineers on reliable software delivery.

Education

Lovely Professional University Phagwara, Punjab
Bachelor of Technology, Computer Science and Engineering – CGPA: 8.1 *Completed July 2026*
Sri Chaitanya Junior College Hyderabad, Telangana
Intermediate – 96.8% *2021 – 2022*

Certifications & Achievements

AWS Certified Generative AI Developer – Credly Apr 2026
Google Cloud Associate Data Practitioner – Credly Mar 2026
Data Visualization with Tableau – Coursera Nov 2024
5-Star Rating in SQL – HackerRank Feb 2025
