## Summary

B.Tech Computer Science graduate focused on Data Analytics, SQL, dashboard development, business intelligence, and data visualization. Experienced in cleaning, transforming, analyzing, and visualizing datasets using SQL, Python, Excel, Tableau, Plotly, and Pandas. Built interactive dashboards and KPI-driven reports to support data-driven decision-making and business insight generation.

## Skills

**Languages:** Python, SQL, Java
**Analytics:** Data Analysis, Data Cleaning, Data Transformation, EDA, Statistical Analysis, KPI Analysis, Business Intelligence
**Visualization:** Tableau, Excel, Plotly, Matplotlib, Seaborn
**Libraries:** Pandas, NumPy
**Reporting:** Dashboard Development, KPI Reporting, Data Visualization, Business Reporting, Insight Generation
**Tools:** Git, GitHub, Google Sheets, Streamlit
**Testing & Automation:** Selenium WebDriver, TestNG, Maven, Page Object Model, WebDriverWait, BDD Cucumber

## Projects

**Traffic Analysis Dashboard** Jan 2025 – Feb 2025
*Tableau, Python, Google Sheets, Geoapify API*
- Designed a real-time traffic analytics dashboard in Tableau to track route efficiency, commercial hotspots, traffic patterns, and operational KPIs.
- Built an automated data extraction and transformation workflow across Google Sheets and Geoapify API, reducing manual processing effort by 80%.
- Generated geospatial insights and KPI-driven reports that improved traffic pattern analysis and enabled data-driven operational decisions.

**DataGroq – AI Document Assistant** Sept 2025
*Python, NLP, EDA, Plotly, Streamlit*
- Built a document analytics platform capable of processing and analyzing 200+ documents to extract summaries, keywords, trends, and business insights.
- Developed data preprocessing workflows including text cleaning, tokenization, classification, and keyword extraction, improving analytical accuracy by 30%.
- Created interactive EDA charts, correlation heatmaps, word clouds, and performance visualizations using Plotly, reducing manual analysis effort by 70%.

**Multi-Phase AI Retrieval and Analytics** Feb 2026 – Mar 2026
*Python, NLP, EDA, Retrieval Metrics, PCA, Streamlit*
- Processed and analyzed 500+ research papers, transforming unstructured text into structured datasets for large-scale research analytics.
- Evaluated retrieval and ranking performance across 30 benchmark scenarios using Recall@5 and MRR to measure search and recommendation quality.
- Developed analytical dashboards with PCA-based visualizations, retrieval metrics, and EDA views to support data-driven model evaluation.

## Work Experience

**Programmer Analyst Trainee** Jan 2026 – May 2026
*Cognizant Technology Solutions*
- Built and maintained a scalable Selenium TestNG automation framework using Java, Page Object Model, WebDriverWait, exception handling, and assertion-based validation.
- Automated end-to-end functional and UI testing workflows by developing reusable test components, improving coverage and reducing manual testing effort.
- Worked with Java, Selenium WebDriver, TestNG, Maven, Git/GitHub, Jenkins CI/CD, and BDD Cucumber in an Agile environment, collaborating with senior engineers on reliable software delivery.

## Education

**Lovely Professional University** Phagwara, Punjab
*Bachelor of Technology, Computer Science and Engineering – CGPA: 8.1* *Completed July 2026*
**Sri Chaitanya Junior College** Hyderabad, Telangana
*Intermediate – 96.8%* *2021 – 2022*

## Certifications & Achievements

AWS Certified Generative AI Developer – Credly Apr 2026
Google Cloud Associate Data Practitioner – Credly Mar 2026
Data Visualization with Tableau – Coursera Nov 2024
5-Star Rating in SQL – HackerRank Feb 2025
