Summary

B.Tech Computer Science graduate focused on Software Testing, Selenium Automation, TestNG frameworks, and quality engineering. Built end-to-end UI automation suites using Java, Selenium WebDriver, TestNG, Maven, Page Object Model, WebDriverWait, ExtentReports, assertions, screenshot capture, and cross-browser testing. Completed Cognizant training with exposure to Agile delivery, Git/GitHub, BDD Cucumber, and reliable test execution practices.

Skills

Languages: Python, Java, SQL
Automation Testing: Selenium WebDriver 4, TestNG, Maven, Page Object Model (POM), WebDriverWait, Cross-browser Testing
Testing Concepts: Functional Testing, UI Testing, Regression Testing, Smoke Testing, Test Case Design, STLC, SDLC, Defect Life Cycle
Framework & Validation: Assertions, Exception Handling, Dropdown Handling, Popup Handling, Screenshot Capture, TestNG XML, dependsOnMethods
Reporting & Utilities: ExtentReports, TestNG Reports, ConfigReader, DriverFactory, Data-driven Testing, Runtime Browser Selection
API & BDD: REST Assured, API Testing, JSON/XML Validation, BDD Cucumber
Tools: Git, Edge, GitHub, Eclipse, Chrome, Firefox

Projects

Flipkart Mobile Automation – E2E Test Automation Suite Feb 2026
Selenium 4, TestNG, Java, POM, ExtentReports

- Built a production-grade Selenium TestNG automation framework automating Flipkart mobile search, filter, sort, and price validation workflows using Page Object Model across 3 page classes.
- Implemented multi-browser support for Chrome, Firefox, and Edge using runtime browser selection, WebDriverWait synchronization, dropdown handling, popup management, and dynamic data extraction.
- Integrated ExtentReports with screenshot capture, pass/fail logging, and TestNG dependency management to improve reporting and framework maintainability.

Multi-Phase AI Retrieval and Analytics Feb 2026 – Mar 2026
Python, NLP, LLMs, RAG, ChromaDB, BM25, NetworkX, Streamlit

- Built a multi-phase AI retrieval and analytics system over 500+ arXiv research papers using Dense Retrieval, Hybrid Retrieval, and Graph RAG techniques for document understanding.
- Evaluated retrieval and ranking performance across 30 benchmark scenarios, achieving Recall@5 of 0.76 and improving MRR by 43%.
- Developed analytical dashboards with PCA-based visualizations, retrieval metrics, and EDA views to support model evaluation and data-driven validation.

BookMyShow Test Automation Suite May 2026
Java, Selenium WebDriver, TestNG, Maven, ExtentReports, POM

- Designed and implemented an end-to-end Selenium TestNG automation framework covering 20 test cases across Home Page, Authentication, Movies Dashboard, and Sports modules.
- Automated functional, navigation, filtering, sorting, and UI validation scenarios using Page Object Model, explicit waits, hard/soft assertions, and exception handling.
- Integrated ExtentReports with automatic screenshot capture and cross-browser execution support for Chrome and Edge.

Work Experience

Programmer Analyst Trainee Jan 2026 – May 2026
Cognizant Technology Solutions

- Built and maintained a scalable Selenium TestNG automation framework using Java, Page Object Model, WebDriverWait, exception handling, and assertion-based validation.
- Automated end-to-end functional, UI, and API testing workflows using Selenium WebDriver and REST Assured, improving test coverage and reducing manual effort.
- Worked with Java, Selenium WebDriver, TestNG, REST Assured, Maven, Git/GitHub, and BDD Cucumber in Agile environments, collaborating with senior engineers on reliable software delivery.

Education

Lovely Professional University Phagwara, Punjab
Bachelor of Technology, Computer Science and Engineering – CGPA: 8.1 *Completed July 2026*

Sri Chaitanya Junior College Hyderabad, Telangana
Intermediate – 96.8% *2021 – 2022*

Certifications & Achievements

AWS Certified Generative AI Developer – Credly Apr 2026
Google Cloud Associate Data Practitioner – Credly Mar 2026
Data Visualization with Tableau – Coursera Nov 2024
5-Star Rating in SQL – HackerRank Feb 2025
