SUMMARY

B.Tech Computer Science graduate with hands-on experience in Data Science, Generative AI, Machine Learning, analytics, and software testing. Built AI-powered and data-driven applications using Python, SQL, NLP, RAG, Streamlit, Tableau, Pandas, NumPy, Plotly, and machine learning techniques. Completed 5 months of Cognizant training with exposure to Java automation frameworks, Agile delivery, Git/GitHub, and Selenium TestNG.

SKILLS

Languages: Python, Java, SQL

AI & Machine Learning: Machine Learning, Deep Learning, Generative AI, LLMs, NLP, RAG, Transformers, Prompt Engineering

Data Science: Pandas, NumPy, EDA, Data Preprocessing, Feature Engineering, Model Evaluation, Predictive Modeling, PCA

Analytics & Visualization: Tableau, Excel, Plotly, Matplotlib, Seaborn, Dashboard Development, Business Intelligence

Frameworks & Tools: GitHub, Streamlit, ChromaDB, Hugging Face, Groq API, Git, Jenkins

Testing & Automation: Selenium WebDriver, TestNG, Maven, Page Object Model (POM), WebDriverWait, BDD Cucumber, Automation Testing

PROJECTS

Traffic Analysis Dashboard

Jan 2025 – Feb 2025

Tableau, Python, Google Sheets, Geoapify API

- Designed a real-time traffic analytics dashboard in Tableau to track route efficiency, commercial hotspots, traffic patterns, and operational KPIs.
- Built an automated data extraction and transformation workflow across Google Sheets and Geoapify API, reducing manual processing effort by 80%.
- Generated geospatial insights and KPI-driven reports that improved traffic pattern analysis and enabled data-driven operational decisions.

Multi-Phase AI Retrieval and Analytics

Feb 2026 – Mar 2026

Python, NLP, LLMs, RAG, ChromaDB, BM25, NetworkX, Streamlit

- Built a multi-phase AI retrieval and analytics system over 500+ arXiv research papers using Dense Retrieval, Hybrid Retrieval, and Graph RAG techniques for document understanding and research intelligence.
- Evaluated retrieval and ranking performance across 30 benchmark scenarios, achieving Recall@5 of 0.76 and improving MRR by 43%.
- Developed analytical dashboards with PCA-based visualizations, retrieval metrics, and EDA views to support model evaluation and data-driven insights.

DataGroq – AI Document Assistant

Sept 2025

Python, Groq API, NLP, Machine Learning, Plotly, Streamlit

- Built a document analytics platform capable of processing and analyzing 200+ documents using NLP, machine learning, and LLM-powered question answering for automated insight generation.
- Developed preprocessing and NLP workflows for tokenization, stopword removal, lemmatization, document classification, and keyword extraction, improving analytical accuracy by 30%.
- Created interactive EDA charts, correlation heatmaps, word clouds, and ML performance plots using Plotly, reducing manual analysis effort by 70%.

WORK EXPERIENCE

Programmer Analyst Trainee

Jan 2026 – May 2026

Cognizant Technology Solutions

- Built and maintained a scalable Selenium TestNG automation framework using Java, Page Object Model, WebDriverWait, exception handling, and assertion-based validation.
- Automated end-to-end functional and UI testing workflows by developing reusable test components, improving coverage and reducing manual testing effort.
- Worked with Java, Selenium WebDriver, TestNG, Maven, Git/GitHub, and BDD Cucumber in an Agile environment, collaborating with senior engineers on reliable software delivery.

EDUCATION

Lovely Professional University

Phagwara, Punjab

Bachelor of Technology, Computer Science and Engineering – CGPA: 8.1

Completed July 2026

Sri Chaitanya Junior College

Hyderabad, Telangana

Intermediate – 96.8%

2021 – 2022

CERTIFICATIONS & ACHIEVEMENTS

AWS Certified Generative AI Developer – Credly

Apr 2026

Google Cloud Associate Data Practitioner – Credly

Mar 2026

Data Visualization with Tableau – Coursera

Nov 2024

5-Star Rating in SQL – HackerRank

Feb 2025
